Checklist 'Security smart devices'

Using this checklist, you can easily see how well secured your smart devices already are and what steps you still need to take for properly secured smart devices.

Your wifi network is password protected with a tricky password

Your smart devices each have their own password

You use two-step verification

All smart devices are up to date

You have set up a guest network

You don't share unnecessary information with your smart devices

Smart devices are disabled when not used for long periods of time

UPnP is disabled

Innovating in partnership with Beeliners
Beeliners is ready to turn your innovative idea into a a working prototype. We do this together with you, because only together will you come up with the best innovations.

Are you curious what Beeliners can do for you? Then drop by for a cup of coffee. We are happy to discuss possibilities with you.
